ACS210.1 Scope

This specification covers geotechnical investigations including trial pits, boreholes, geophysical ground investigation and laboratory testing.

ACS210.2 Standards

The following standards and guidelines shall be applied to relevant parts of the Works. It should be noted that these in turn may require reference to other standards. In all cases the documents below are to include all amendments current at the time of the tender.

- New Zealand Geological Society (NZGS) Ground Investigation Specification.

ACS210.3 Geotechnical investigations

Geotechnical investigations shall be carried out in accordance with the NZGS Ground Investigation Specification Volume 1 and the particular specifications.
